Cyber Breach Response

Your first call in the event of a cyberattack

Cybersecurity threats are a business reality. As cyberattacks increase in volume and complexity, the loss of customer data and other sensitive information, as well as damage to data and computer systems, can put your entire organization at risk.

If your business becomes a victim, you need an **instant response**. As your insurer, we offer expertise and services that can instantly assess your situation and begin to mitigate the incident.

Canopius Global Cyber Response Service

We provide a 24/7 service for cyber incidents or data breaches. Our team is here to guide, coordinate, and ensure that we are positioned to fully support your business's recovery.

Cyber Breach Response

Instant access to professional, global expertise

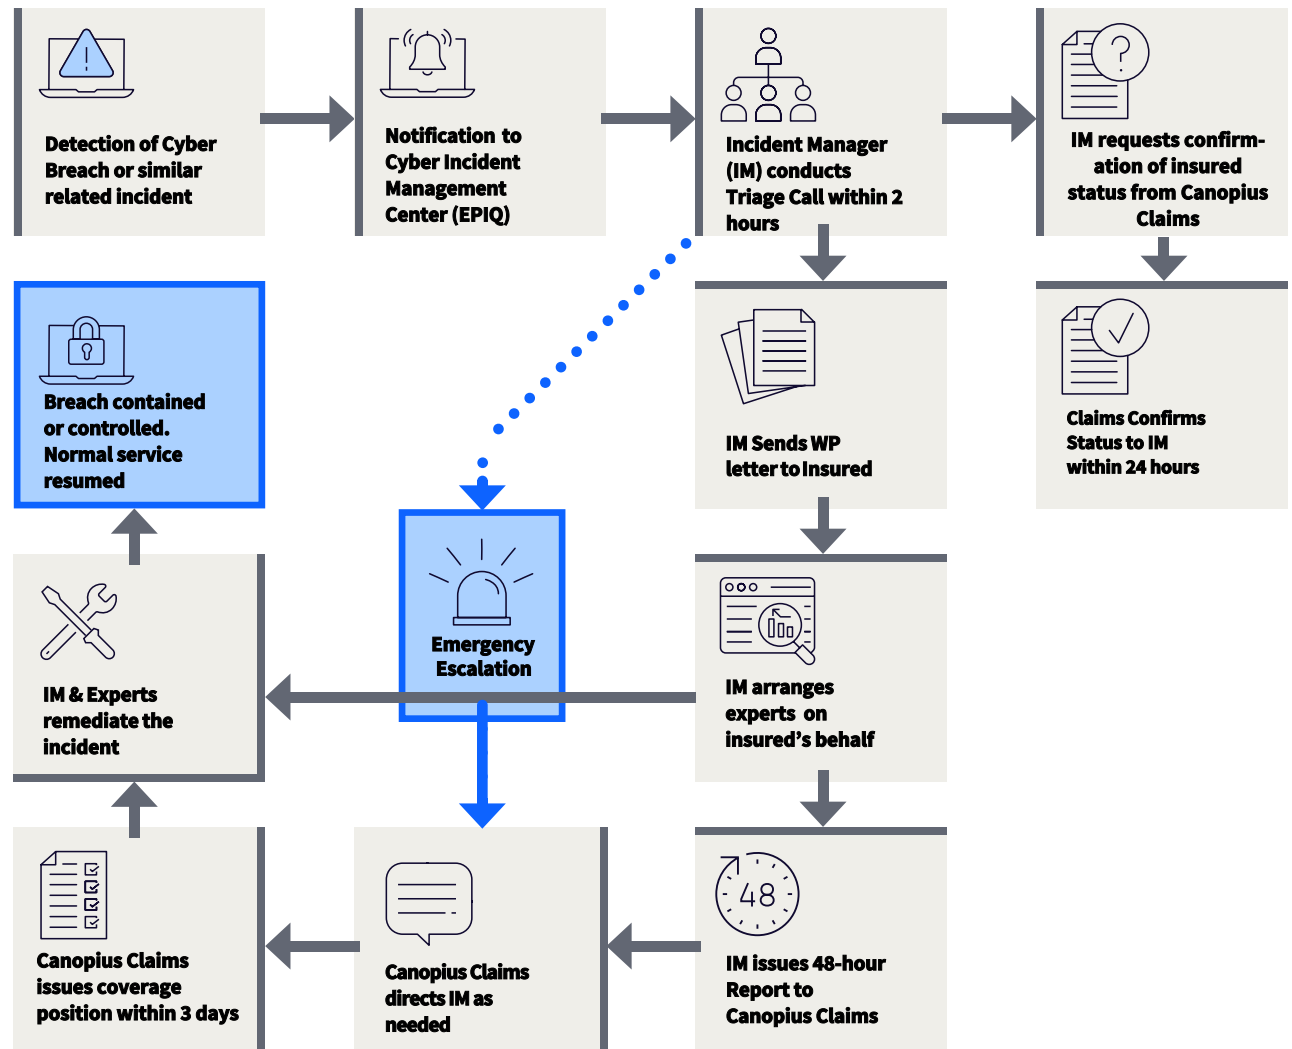

Canopus has a Global Cyber Response Service which takes notifications of new incidents through a centralized call center or a constantly monitored inbox:

- 24·7·365 Initial Triage
- Access to Incident Management experts
- Access to our panel of expert service providers – IT Forensic, Legal, PR and more
- Strictly enforced service levels
- Multilingual capabilities

Our global team can provide dedicated underwriting, claims and risk management support.

The Canopus Global Cyber Response Service

Cyber Breach Response

Canopus Cyber Incident Managers – your cyber response within two hours

Within just two hours of calling the call center or using the monitored email address, an **Incident Manager** (IM) will provide a call-back to the nominated point of contact of the Insured to conduct an **initial incident fact find**.

During this call, the Incident Manager will **recommend appropriate steps to respond to the incident**, which may include engaging one or more of our expert service providers from our panel.

Our Incident Managers are based all around the world, speaking a wide array of languages. They are seasoned experts in handling cyber incidents and **will support the Insured throughout its claim** with a carefully managed and coordinated response.

In some instances, Insureds have **specialist systems which require specific service providers to remediate**. The Incident Manager is empowered to consider such vendors in a claim scenario and will agree to their use (subject to a general reservation of rights) on a case-by-case basis.

World class service providers, available to support you

Incident Managers can call upon a range of firms from the Canopus panel with global expertise covering more than 200 countries and territories around the world.

All firms have pre-agreed discounted rates and Service Level Agreements (SLAs) to benefit Measured's policyholders. These pre-agreed rates ensure that our policyholders do not have to accept potentially higher 'crisis' rack rates and can instead move immediately to the incident response, rather than negotiating over the contract and rate card.

Cyber Breach Response

The Canopus Cyber Response Service Global Panel

Ransomware / IT Forensic/ Restoration

Legal Services

Public Relations

Relations Identity Protection & Mass Notification

This is our global panel and some of these vendors may only operate from specific territories. The overall panel provides a global capability and our Incident Managers can draw upon additional panel firms where required to ensure a high quality and vetted service for our policyholders.

Making your claim

The **Canopus Incident Managers** are not empowered to make decisions on whether an incident is covered. Coverage is not part of their role; they are experts in supporting you if a cyber incident occurs.

Our expert **Cyber Claims Team** will liaise with the Incident Manager and service providers to obtain the facts necessary to determine whether your claim is valid.

Canopus' Cyber Claims Team will also communicate with your insurance broker to provide a **prompt and clear assessment of the coverage available** for any incident.

We will aim to respond to any notification to the Cyber Response Service within **five working days** with an initial claims assessment.
